

# Knife Use & Handling

It is essential to follow safe knife handling procedures to ensure that you perform the job **CORRECTLY & SAFELY**

Hold your knife with the correct grip - this will reduce the chance of injury.

Steel your knife softly at an angle of 22 degrees; steel it often (at least every 3 minutes) and only steel 3 times each side.

Keep your knife sharp.

Never walk with a knife in your hand. When you are not using your knife put it in your pouch.

Important things to remember when handling a knife:

- ✓ Put your knife away when pulling product.
- ✓ always cut away from yourself - be aware of others and do not cut towards them.
